

## 851 Series hi-fi

# The quest for perfect music reproduction keeps our designers awake at night...

When we set about developing our 851 Series the brief was simple. To make a hi-fi system that not only sounded better than anything else, but one that's capable of delivering stunning results from computer audio, connected home entertainment devices and of course, good old CD or vinyl.

Developed over a period of two years at Cambridge Audio's Research and Development Centre in the heart of London, the new 851 Series offers the perfect balance of powerful detailed performance and the ability to deliver exceptional results from music of all formats. Our flagship range also benefits from a raft of proprietary technologies developed for one reason only; to guarantee you a spine-tingling performance every time...

Music flexes the mind and stirs the soul and no amount of component design, scientific measurement or analysis can replicate the true judge of amazing sound; your ears. We call this our Sound First approach to hi-fi design and believe it's what sets Cambridge Audio apart from the crowd.

Available exclusively from

We invite you to audition the 851 Series at your nearest Cambridge Audio specialist. To locate yours visit [www.cambridgeaudio.com/851](http://www.cambridgeaudio.com/851)

Sam Ellenby, one of our 851 Series designers

### Sound First comes as standard

"While some audio designers spend every waking moment on the test bench, we like to take time as our creations progress to listen to them and hear how they benefit our favourite music. We take them home, play them to our friends and throughout the development process, we make subtle changes to deliver the best results we possibly can."

# Cambridge Audio

Your music + our passion
